KEY MESSAGES FOR URBAN MANAGERS

WHY PARTICIPATORY CITY-WIDE SLUM UPGRADING MATTERS

KEY STATEMENT:
Participatory city-wide slum upgrading is a pre-condition and trigger for inclusive and sustainable urbanization. The approach strengthens everyone’s capacity to contribute and benefit from the advantages of urbanization, including slum dwellers themselves.
KEY MESSAGES:

- Urbanization is occurring in all countries around the world and is one of the major trends of the 21st Century.
- Urban areas are the engines of national economic growth and presently account for 70% of the world’s gross domestic product (GDP): 55% of GDP in low-income countries, 73% in middle-income countries, and 85% in high-income countries¹. No country has ever achieved sustained economic growth, rapid social development and gender equality without urbanizing.
- The exclusion of large sections of the urban population, such as those living in informal settlements and slums, ignores human rights conventions and incurs a range of costs (lost productivity and insecurity) that undermines sustainable urbanization because the full potential of all urban dwellers is not harnessed.
- Research shows that slums are full of economic, cultural and social capital². While slums are deprived urban areas, people are also making a living, raising families and contributing to the broader urban economy. The energy and creativity of slum dwellers should be recognized and incorporated into urban improvement activities.
- Research shows a clear correlation between sustainable urbanization, land rights and security of tenure: those urban dwellers with secure land rights have more long-term and intergenerational social and economic stability.
- Research also shows that significant levels of urban inequality undermine your town and city’s capacity to be sustainable. Urban areas with significant proportions of slums and informal settlements are thus not sustainable and prosperous³.
- A key for urban prosperity is creativity. Urbanization is where mind-set change occurs and creativity is sparked. Cities and towns which provide access to education, exposure to new people, different cultures, are places where thinking is changed and new ideas generated for social, economic, environmental benefits.
- The type approach to urbanization used is critical to harness its positive elements and thus achieve improvements to the lives of slum dwellers. Sustainable and inclusive urbanization is underpinned by:
  1. A pro-poor vision which translates into inclusive actions (recognizes both the rights and value of slum dwellers as assets to the urbanization process, brings together all the key government partners and external stakeholders, focuses on socio-economic development directed by harnessing the informal economy and livelihood activities).
  2. Comprehensive integration of sectors, governance arrangements and people (government departments, key actors and groups, joined up physical plans responding to key policy, legislative and regulatory elements).
  3. A strategic focus on all scales (projects are directed at local impact but within a broader strategic focus of the city and region).
  4. Appropriate and innovative financing mechanisms (sufficient investment for both upgrading and maintenance, pro-poor financing (micro-financing, community managed funds).
- The political will to improve the lives of all urban dwellers including those living in slums. Urban managers and politicians have a chance to leave a lasting legacy through sustainable urbanization development choices that include and engage slum dwellers.

KEY RECOMMENDATION:
Integrate slum dwellers into the rest of the urban context to facilitate sustainable urbanization for all.

KEY ACTION:
Pro-poor national urban policies and city-wide slum upgrading strategies as instruments to achieve the integration of slum dwellers for sustainable urbanization.

Table 1: Additional Recommendations and Actions

<table>
<thead>
<tr>
<th>ADDITIONAL RECOMMENDATIONS</th>
<th>ADDITIONAL SPECIFIC ACTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>RECOGNIZE SLUM DWELLERS</strong></td>
<td>- Start meaningful conversations, via an integrated planning approach (using a city-wide slum upgrading strategy as a trigger), between your policy makers, key departmental heads and politicians, to foster mind-set change.</td>
</tr>
<tr>
<td>Change the view that slum dwellers are illegal. Start to insti- tutionalize a more positive outlook focusing on what slum dwellers actually contribute to the broader urban environment (employment, livelihood activi- ties, local economic development and cultural activities)</td>
<td>- Undertake an inventory to understand the slum economy and its contribution to the rest of the city,</td>
</tr>
<tr>
<td>- Support efforts to realize slum dwellers’ potential and harness their energy. This includes countering any discussions about forced evictions with arguments around the benefits of inclusion and the right to adequate housing.</td>
<td>- Identify some ‘quick win’ projects and interventions to demonstrate the value of micro-enterprises operating in slums and slum dwellers’ skills,</td>
</tr>
<tr>
<td>- Dedicate funds for slum upgrading through key partnerships across all levels of government but also including the international community, local organizations and the private sector.</td>
<td>- Adopt a humanitarian approach to slum dwellers as a collective vulnerable group who have much to offer the urban development agenda of your town and city.</td>
</tr>
<tr>
<td><strong>LINK SLUM UPGRADE WITH SUSTAINABLE PROSPERITY FOR ALL</strong></td>
<td>- Undertake an inventory to understand the slum economy and its contribution to the rest of the city,</td>
</tr>
<tr>
<td>Understand and promote slum upgrading as a mechanism to facilitate sustainable urbanization for all.</td>
<td>- Reflect ‘city-wide approaches’ to slum upgrading in the development of a ‘city-wide slum upgrading strategy’ to maximize the benefits of connecting any planned intervention with other key and strategic urban developments (especially those related to economic hubs, road, utility, service and housing infrastructure) and departments/actors.</td>
</tr>
<tr>
<td>Recognize that urban issues cannot be addressed in isolation, but must be considered in terms of relationships - linkages between different departments, interventions and how the urban context is ‘a system’ with interlinked components.</td>
<td>- Review what urban data is being collected in your town or city. Find out how that information is effectively being used and communicated, especially to decision makers and planners are empowered.</td>
</tr>
<tr>
<td><strong>MAKE ‘INCLUSION’ A MANTRA FOR URBANIZATION</strong></td>
<td>- Form a team to understand how slum upgrading would work in your town or city.</td>
</tr>
<tr>
<td>Make inclusion a mantra for facilitating city-wide inclusive urbanization which includes slum dwellers.</td>
<td>- Undertake an inventory of current strategic plans and development projects to ensure your plans speak to each other and reflect an integrated overview your vision for the city.</td>
</tr>
<tr>
<td><strong>PROMOTE SECURITY OF TENURE FOR ALL</strong></td>
<td>- Review ‘big ticket’ plans (infrastructure, economic, environmental, waste management and affordable housing plans) and ask if they are pro-poor and how slums specifically can be included into the development agenda.</td>
</tr>
<tr>
<td>Ensure slum upgrading is participatory in its design and implementation. Remember to ensure key decision makers take part as well as slum dwellers themselves. Everyone has good ideas to contribute.</td>
<td>- Review planning frameworks to understand if participatory planning is mandatory to promote your inclusivity agenda.</td>
</tr>
<tr>
<td><strong>GET THE BEST INFORMATION TO PROMOTE UNDERSTANDING AND ACTION</strong></td>
<td>- Develop a broad stakeholder group to develop a city-wide slum upgrading strategy which considers the strengths of slum dwellers and slums.</td>
</tr>
<tr>
<td>Ensure that there is an institution or department effectively gathering disaggregated city wide data on all urban dwellers – especially the ones living in informal settlements and slums in peri-urban areas. Ensure that there is information on core components like current population, types of households including female headed households and population growth.</td>
<td>- Take steps to ensure that all planning is participatory and inclusive. Review planning frameworks to understand if participatory planning is mandatory to promote your inclusivity agenda.</td>
</tr>
<tr>
<td><strong>ALLOCATE FUNDS FOR SLUM UPGRADE THROUGH PARTNERSHIPS</strong></td>
<td>- Using ‘prosperity for all arguments’, make a political commitment to improve security of tenure for slum and informal settlement dwellers using the continuum of land rights approach (utilizing options including long-term leases, space use rights, community tenure).</td>
</tr>
<tr>
<td>Dedicate funds for slum upgrading through key partnerships across all levels of government but also including the international community, local organizations and the private sector.</td>
<td>- Update your land records by undertaking a participatory enumeration process.</td>
</tr>
<tr>
<td>- As part of national or city-wide slum upgrading strategies, allocate funds for incremental slum upgrading over an agreed time frame.</td>
<td>- Commit to no forced evictions in your slum upgrading and urban development approaches.</td>
</tr>
<tr>
<td>- Foster financing partnerships and do a stock-take of available financing mechanisms to support such collaborations.</td>
<td>- Undertake an inventory of current strategic plans and development projects to ensure your plans speak to each other and reflect an integrated overview your vision for the city.</td>
</tr>
<tr>
<td>- Develop micro-financing mechanisms and community managed funds for adequate housing, improvements to basic services and local economic development.</td>
<td>- Review ‘big ticket’ plans (infrastructure, economic, environmental, waste management and affordable housing plans) and ask if they are pro-poor and how slums specifically can be included into the development agenda.</td>
</tr>
